

Special Cast Steel Rolls

Hitachi Roll Material

- Adamite Steel
- Cr Iron
- Cr Steel
- Definite Chilled Iron
- High Speed Steel
- Indefinite Chilled Iron
- Nodular Iron
- Special Cast Steel**

To increase the toughness of Hitachi's Special Cast Steel Rolls, the carbon content of the rolls is lower than other cast rolls. This process makes these steel rolls, which can withstand heat and heavy rolling loads, suitable for work rolls and back-up rolls. Applications for Special Cast Steel Rolls include:

CPL, CP1 and CP2

Blooming, roughing and heavy section roll; toughness requirement.

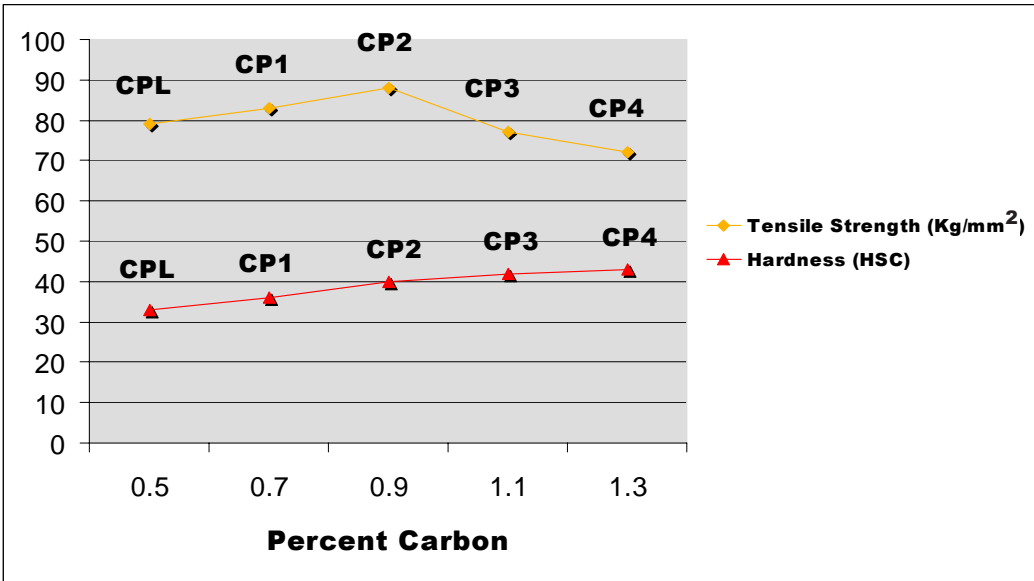

CP3 and CP4

Blooming, roughing and heavy section rolls; toughness and wear-resistance requirements.
